ABOUT ME

A software developer with 5 months of working experience and a bachelor's degree in CS, mainly specializing in **C#/.NET** and related technologies, also familiar with front-end development (**Angular**). Currently working towards the Microsoft AZ-900 certification.

WORK EXPERIENCE

"LD Lamination" LLC: Freelance Full Stack Developer (.NET Core & Angular) 06/2023 – 10/2023 (5 months)

- Built a web application which contains all the information concerning the company's services in a team of two, according to the list of functional requirements provided by the client (PVC window profile lamination company).
- Ensured maintainability and scalability of an application via utilizing the **clean architecture** and **repository pattern** (separation of the database-related functionality from other components) in the back-end solution.
- Implemented **authentication** and **authorization** for the administrator using **JWT**.
- Implemented the **administrator panel**, which lets the administrator perform **CRUD operations** over the information on the website and access performance reports, which increases the convenience of introducing any changes and gathering information.

Technologies and concepts used:

- Back-end - **C#, ASP.NET 7 Core Web API, Entity Framework (EF) Core, MS SQL Server**
- Unit tests - **xUnit, FluentAssertions, FakeItEasy**
- Front-end - **Angular, TypeScript, HTML, CSS, Bootstrap**
- Team-management - **Azure DevOps** platform with **Agile (Scrum)** methodology

EDUCATION

University of Information Technology and Management in Rzeszow, Poland 10/2020 – 10/2023

Bachelor's Degree in Computer Science (studies in English), GPA: 4.25/5.0

MAIN SKILLS
